Quitch

A mobile learning platform designed to improve retention and boost performance through game-based techniques.

In 2015, accounting lecturer Dr Grainne Oates decided to do something about her biggest challenge — engaging and retaining distracted students struggling with their course content.

Mulling over the problem, Dr Oates devised an idea to harness the very thing that was distracting her students to learn. The solution was Quitch—a gamified, mobile e-learning app that changes the way learners engage with knowledge.

Quitch is now delivering learning outcomes for educators and trainers in universities, colleges, businesses and associations across the globe.
